

BUILT FOR THE CANADIAN CLIMATE

Unsurpassed vertical integration and ISO 9001 / ISO 14000 monitored manufacturing processes help support the R&D team.

- **High impact** compression moulded fiberglass skins are “weatherproof” and will not delaminate, corrode, mold or mildew. Nan Ya fiberglass doors also do not dent, rust, warp, crack, split, splinter, or rot and are very easy to keep clean.
- **Waterproof composite stiles** and rails are sealed and beautifully finished to protect all edges of the door from moisture penetration which could harm the inner insulation. The composite material will not delaminate or splinter and boasts twice the screw-holding capacity of typical wood-edge doors. The top and bottom rails are also composite components that prevent water seepage, are easy to trim and pre-machined to accommodate the bottom weather sweep. This patented innovation protects every Designer Arch fiberglass door from moisture infiltration.
- **Full length lock block** and more internal structure than any door of its kind in North America. This structural reinforcement also ensures added security against forced entry and provides incomparable stability.
- **Guaranteed.** Nan Ya backs every door with a 25 year limited manufacturer’s warranty. Not only do they stand behind any manufacturing defects, they also warrant against ‘thermal bow’.
