

ULTIMATE TRILENNIUM® ASTRAGAL

Built to complement the unmatched strength of the Trilennium Multi-Point Lock, the Ultimate Trilennium Astragal delivers ultimate French door security and protection.

- ▶ **Unmatched Multi-Point Security:** The Ultimate Trilennium Astragal works with the Trilennium Multi-Point Locking System's solid I-beam construction and three full deadbolts to deliver a high security system that cannot be matched.
- ▶ **Fights Deflection at All Times:** Trilennium bolts pre-engage even when the door is unlocked fighting deflection at all times. Once locked, bolts work with the astragal's unique strike plates to pull both doors into perfect alignment.
- ▶ **Superior Sealing:** Spring-loaded Floating Boot, Simple Solution® Corner Pad, weatherstrip and full-length Sealing Fin work with added locking points to fight leaks from top to bottom.
- ▶ **One-Flip Operation:** Single flip of the built-in lever activates both bolts and secures the door. No more reaching or bending.
- ▶ **Works with Trilennium Compatible Hardware**
- ▶ **4-Way Adjustable Strike Retainer**

ULTIMATE TRILENNIUM® ASTRAGAL

FLIP LEVER: HOW DOES IT WORK?

FLIP LEVER DOWN.

A single flip of the lever activates both the bolts in one effortless motion. The Spring-loaded Floating Boot securely seals, independently of the bolt, against the sill fighting air and water infiltration, even in imperfect conditions.

FLIP LEVER UP.

Raising the Flip Lever retracts both the bolts. The Spring-loaded Floating Boot lifts clear of the sill preventing wear and damage for problem-free use of the inactive door.

SPECIFICATIONS OVERVIEW

FEATURES	AVAILABILITY & OPTIONS
