

WEST FOUR
Distribution

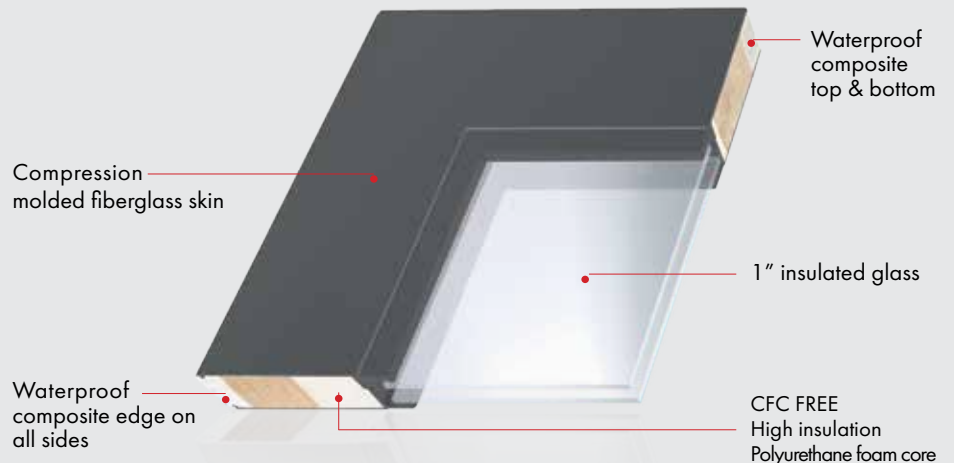

STANDARD FEATURES

- Direct glazed full 1-lite or 3/4 lite fiberglass door panels
- Glass unit is built between the panels using a sandwich process to reduce installation time and labor and to provide maximum seal failure protection
- Square edge glazing beads for a classic Shaker look and easy application of SDL bars
- Full length lock block for standard or multipoint lock
- The interior and exterior surfaces feature a brushed black texture, which can be painted in an alternative colour to complement the home's decor
- Combining composite door jambs and accessories available from Richersons to build the best performing fiberglass door systems

- Stainable and paintable brushed surface
- Square edge shaker look beadings allow for an easy SDL application

NEULITE GLASS OPTIONS

Standard LoE Clear

Translucent

Miniblind Option

F U L L P R I V A C Y L E V E L

Wider Daylight & View

On a 3'0 width door, Neulite provides 19% more daylight than a traditional doorlite frame insert.

Sound Reduction

Neulite triple glaze laminated glass option obtains a STC rating of 38db.

No Screws and caps

Neulite eliminates the need for a lite frame and provides a high-performance weather seal. In addition, no more hassle with screws and caps.
